

Task 36: Number of Recent Calls

Problem Description

You have a RecentCounter class which counts the number of recent requests within a certain time frame. Implement the RecentCounter class.

Java Solution

```
class RecentCounter {
    Queue<Integer> q;

    public RecentCounter() {
        q = new LinkedList<>();
    }

    public int ping(int t) {
        q.offer(t);
        while (q.peek() < t - 3000) {
            q.poll();
        }
        return q.size();
    }
}
```
