

Task 39: Binary Tree Inorder Traversal

Problem Description

Given the root of a binary tree, return the inorder traversal of its nodes' values.

Java Solution

```
class Solution {
    public List<Integer> inorderTraversal(TreeNode root) {
        List<Integer> res = new ArrayList<>();
        helper(root, res);
        return res;
    }

    private void helper(TreeNode root, List<Integer> res) {
        if (root != null) {
            helper(root.left, res);
            res.add(root.val);
            helper(root.right, res);
        }
    }
}
```
